

FLYING UNDER THE INFLUENCE

Dragons are great social media users, and like the rest of us they go to YouTube to find solutions to their problems, from household repair to makeup tips to craft lessons. But the raison d'être for YouTube is trying to sell you stuff by loading targeted ads before your video plays. Boy has the targeting become advanced - you can probably figure out who is watching from the ads! In the end, you might be able to figure out the business name – and slogan! -- created by one ambitious dragon-entrepreneur.
